INFORMATION ON THE GROUP

The Group is principally engaged in property development and investment and provision of financial services in Hong Kong and the PRC.

REASONS FOR AND BENEFITS OF THE ACQUISITION

As set out in the annual report of the Company for the financial year ended 31 March 2006, the Group takes every opportunity to focus upon and expand its strategic business developments in property and finance industries with proactive approach. The Group seek to find new potential investments and on the other hand, maintain effective cost control measures to maximize the Shareholders' return.

Phosphate rock is an important commercial source of phosphorus, which is used to make chemicals for use in many applications such as production of fine china, laundry detergents, food applications such as soda beverages, toothpaste and steel production. The most important use of phosphate rock, though, is in the production of phosphate fertilizers for agriculture and calcium phosphate nutritional supplements for animals. According to International Fertilizer Industry Association, phosphorus is the main raw material often used, among others, to produce chemical fertilizers and animal feed supplements.

According to China Phosphate Fertilizer Industry Association (中國磷肥工業協會), domestic PRC demand for phosphate rock was 43 million tonnes compared to domestic supply of 36 million tonnes in 2005. At the same time, export volume of phosphate rock have continued to increase due to strong demand for the mineral in the international market. Hubei Province increased its export of phosphate rock by 14.9% in 2004 to approximately 9.92 million tonnes and the export volume for the first two months of 2005 was approximately 5.3 million tonnes.

With the continued increase in demand and applications of phosphorus in these aspects, the Directors expect sustained demand for phosphate rock in both domestic and international markets. The Directors consider the Acquisition represents a good opportunity for the Group to expand into other business avenues and to explore its revenue sources. Having considered the above and the future prospects of Zhiyue, and also the Consideration was arrived at after arm's length negotiations with the Vendors and on normal commercial terms, the Directors (including the independent non-executive Directors) are of the opinion that the Acquisition was conducted upon normal commercial terms and are fair and reasonable so far as the Shareholders as a whole are concerned.
